System Integrator 2016 R2 is the latest version of D-Tools' award-winning software platform. Building new functionality on the architecture of the System Integrator platform as well as expanding on D-Tools' Cloud infrastructure, SI 2016 R2 makes it faster and easier than ever to perform key functions of an integrator's business — estimation, system design, and project management.

SI 2016 R2 adds valuable new productivity features and enhancements that enable Commercial and Residential AV integrators to both maximize the efficiency of their business processes and increase profitability, while simultaneously reducing overhead. The application delivers a powerful yet easy to use solution that provides a positive impact on any integrator's business.

New Enhancements Include:

- **Projects —**

    Import from CSV files to projects to support adding and updating items, and field mapping

    Allow project items to be locked

- **Catalog —**

    Add options on which fields to update for matched products in downloads

    Include Approved in the Product Import and Export field lists

- **Drawings —**

    AutoCAD 2017 support including schematics

    NFPA shapes
    (National Fire Protection Association)

- **Reports —**

    Improved Report Settings dialog

    Project Contact information includes complete contact address

    Double click a report to Run and Close report dialog

    Add prompt to use Price from Catalog when adding Site Items to Service Orders

- **Scheduling —**

    Improved calendar to show tasks and service orders in a list for selected dates

    Update from Tasks in Project Editor updates Tasks from Mobile Install

    Option to use catalog description when adding Site Items to Mobile Install

    Add prompt to use Price from Catalog when adding Site Items to Service Orders

- **QuickBooks —**

    Allow all SI users to connect to QuickBooks Online file even if not QBO Administrators
