

The software for centralised communication in care

Why make things hard when they can be easy? With nooa, you and your staff can communicate quickly and securely without any additional effort.

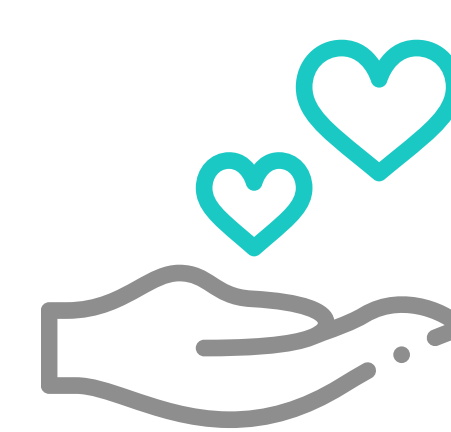

40% less admin

Reduce back and forth in your service and save a lot of time and effort

Satisfied clients

Keep clients happy by staying on top of things and reacting in real-time

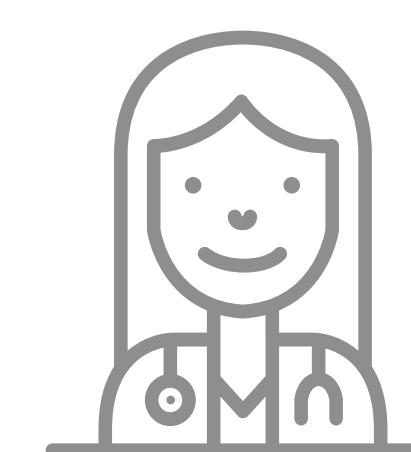

Improved communication

Streamline your communication and replace the chaos of paper, emails and insecure messengers

Better working conditions

Use familiar technology developed by carers to reduce stress and improve well-being

Up and running in no time

Whether smartphone, PC or tablet - you can use nooa on all devices without any additional set-up

The nooa Platform

With nooa, you and your staff have secure access to internal and external communication - any time, anywhere. Information is centralised and shared in real-time, reducing admin and keeping clients and staff happy.

Internal communication

Effortlessly manage client visits, streamline admin and follow-up on incidents - save valuable time and keep everyone on the same page

External communication

Easily connect with clients and families and cooperate with partners to improve your services in no time, driving client satisfaction through the roof

Real-time notifications

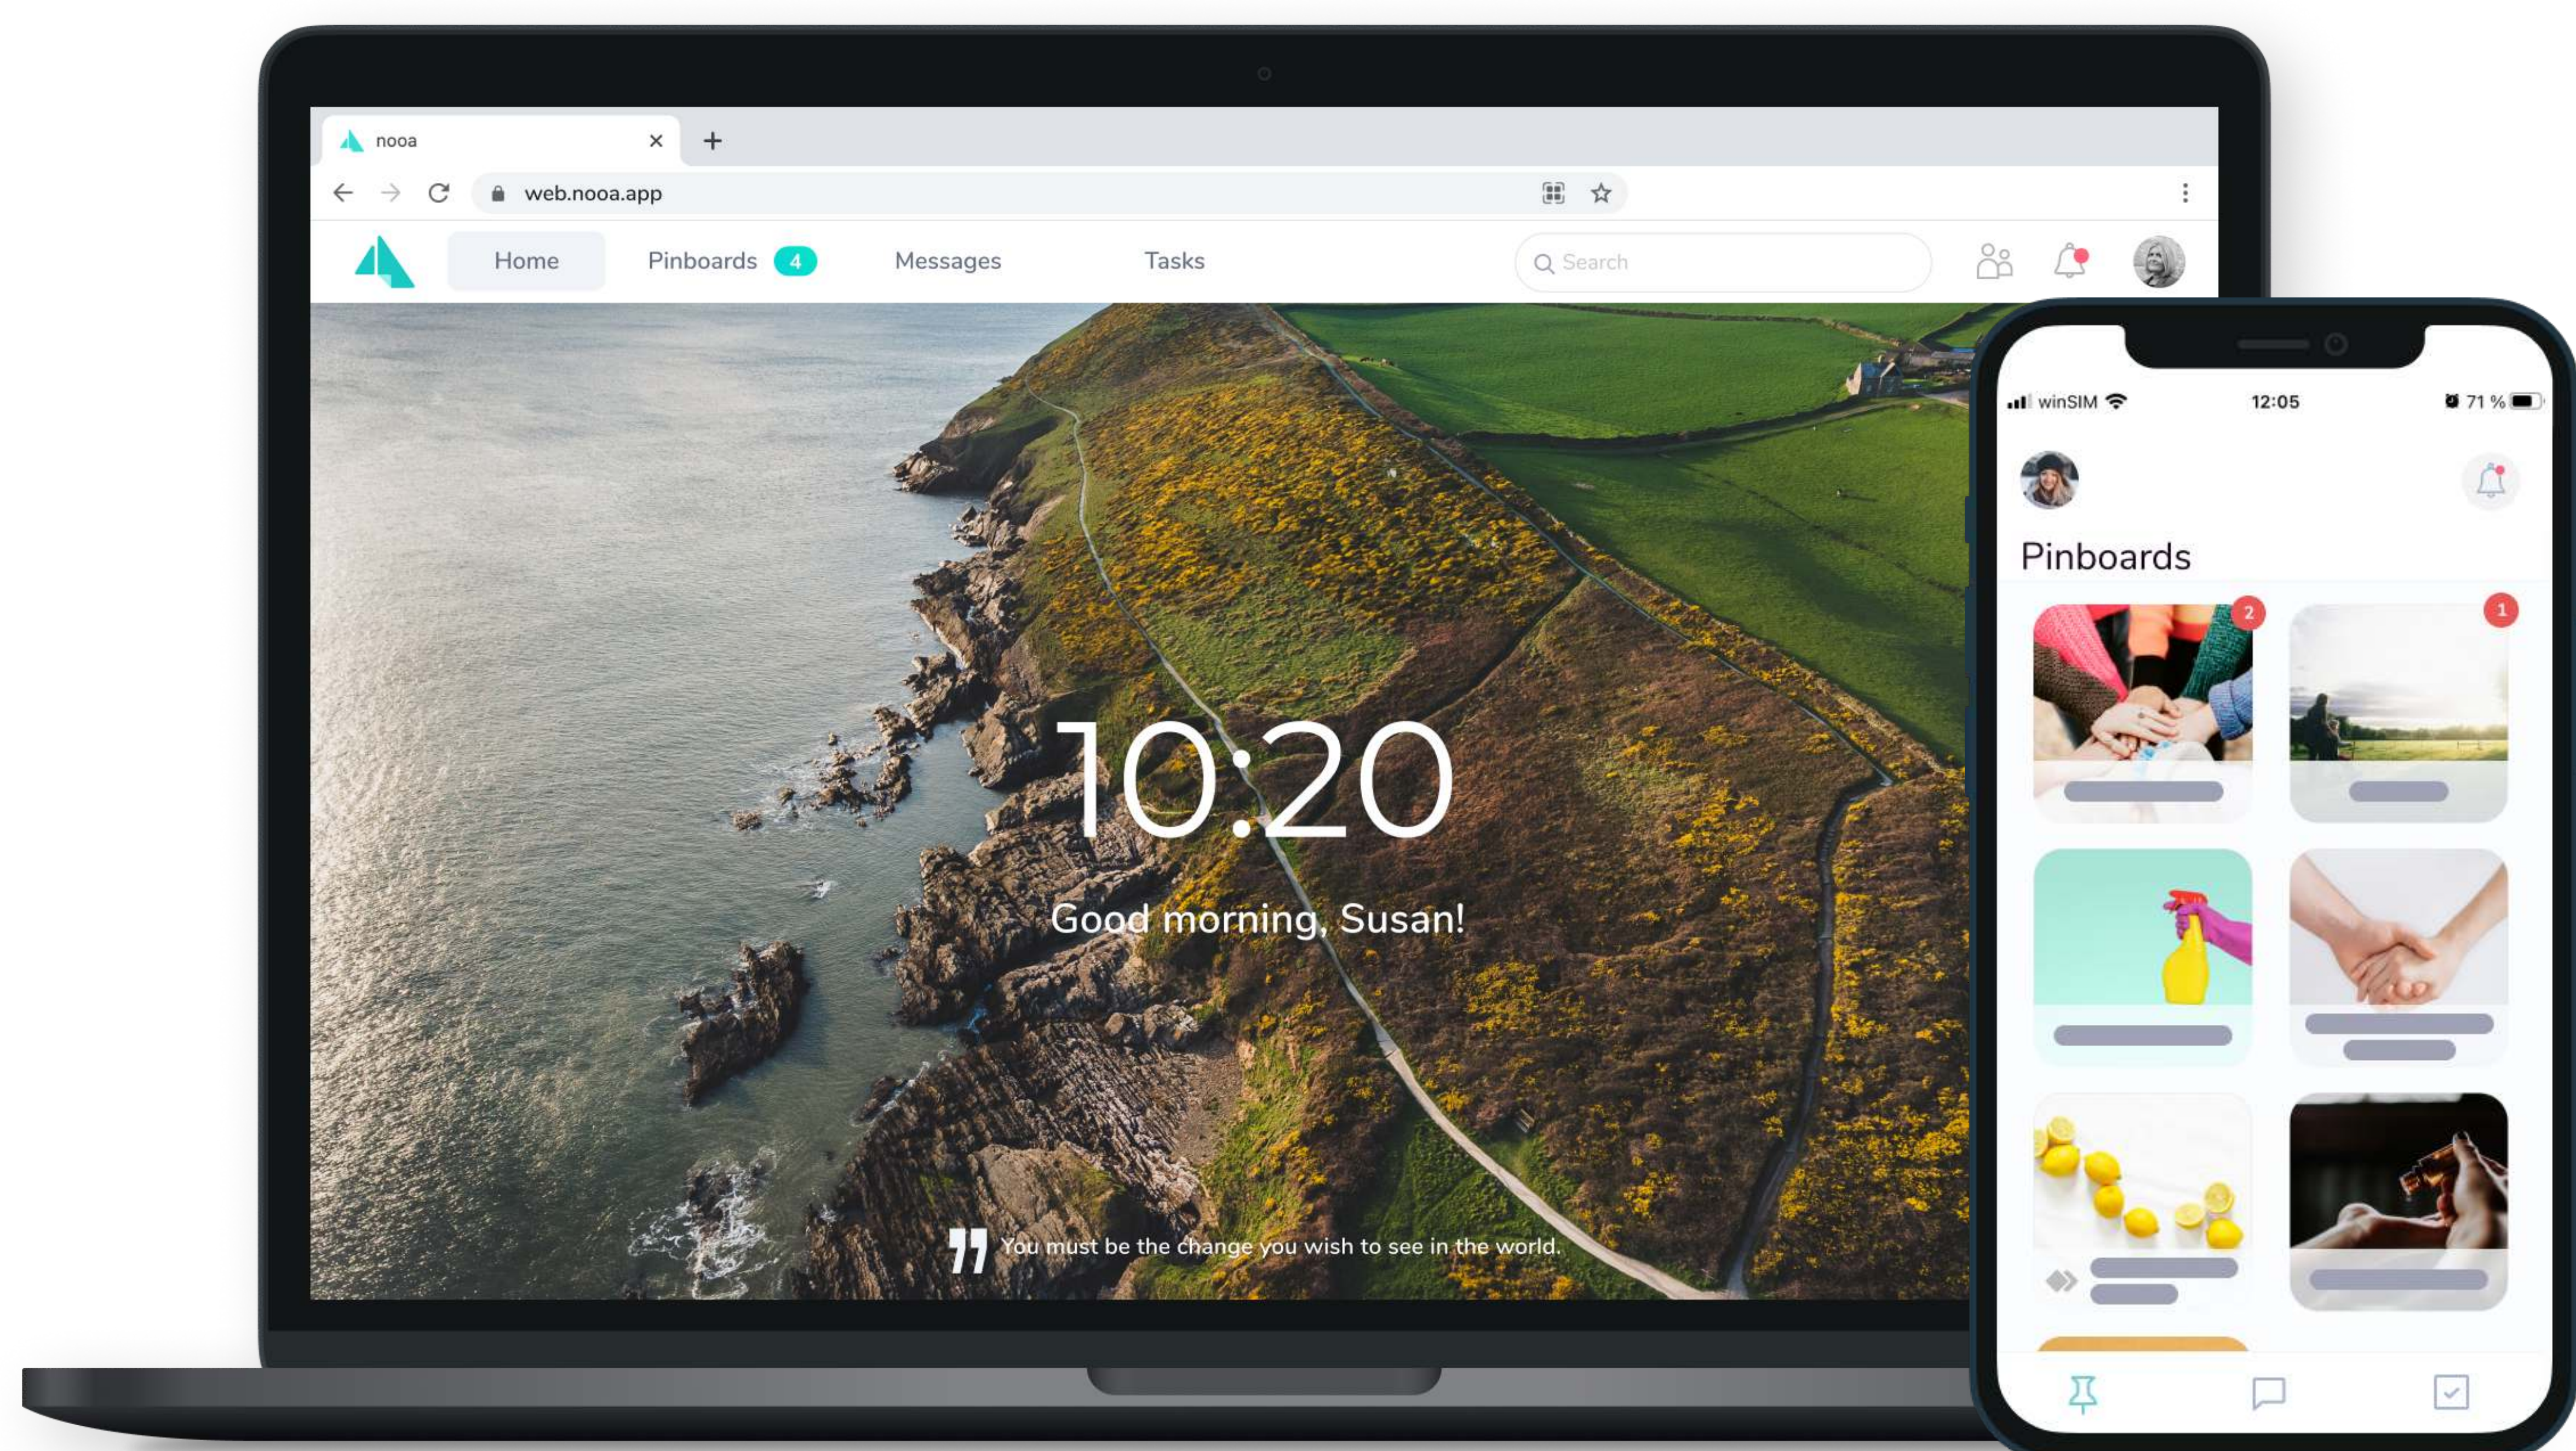

Visual and acoustic notifications ensure that important information isn't missed - the CQC will like that

Data privacy compliant

Whether you share text, images or files: with nooa, communication is transmitted and stored securely

Full control

Admins define roles and user access, managing them in one place to ensure information can only be viewed by authorized users

Customised Pinboards

Keep teams connected with custom pinboards. Create pinboards your service needs to streamline communication and cooperation. The best part: nooa adapts to your needs, not the other way around.

Share updates in real-time

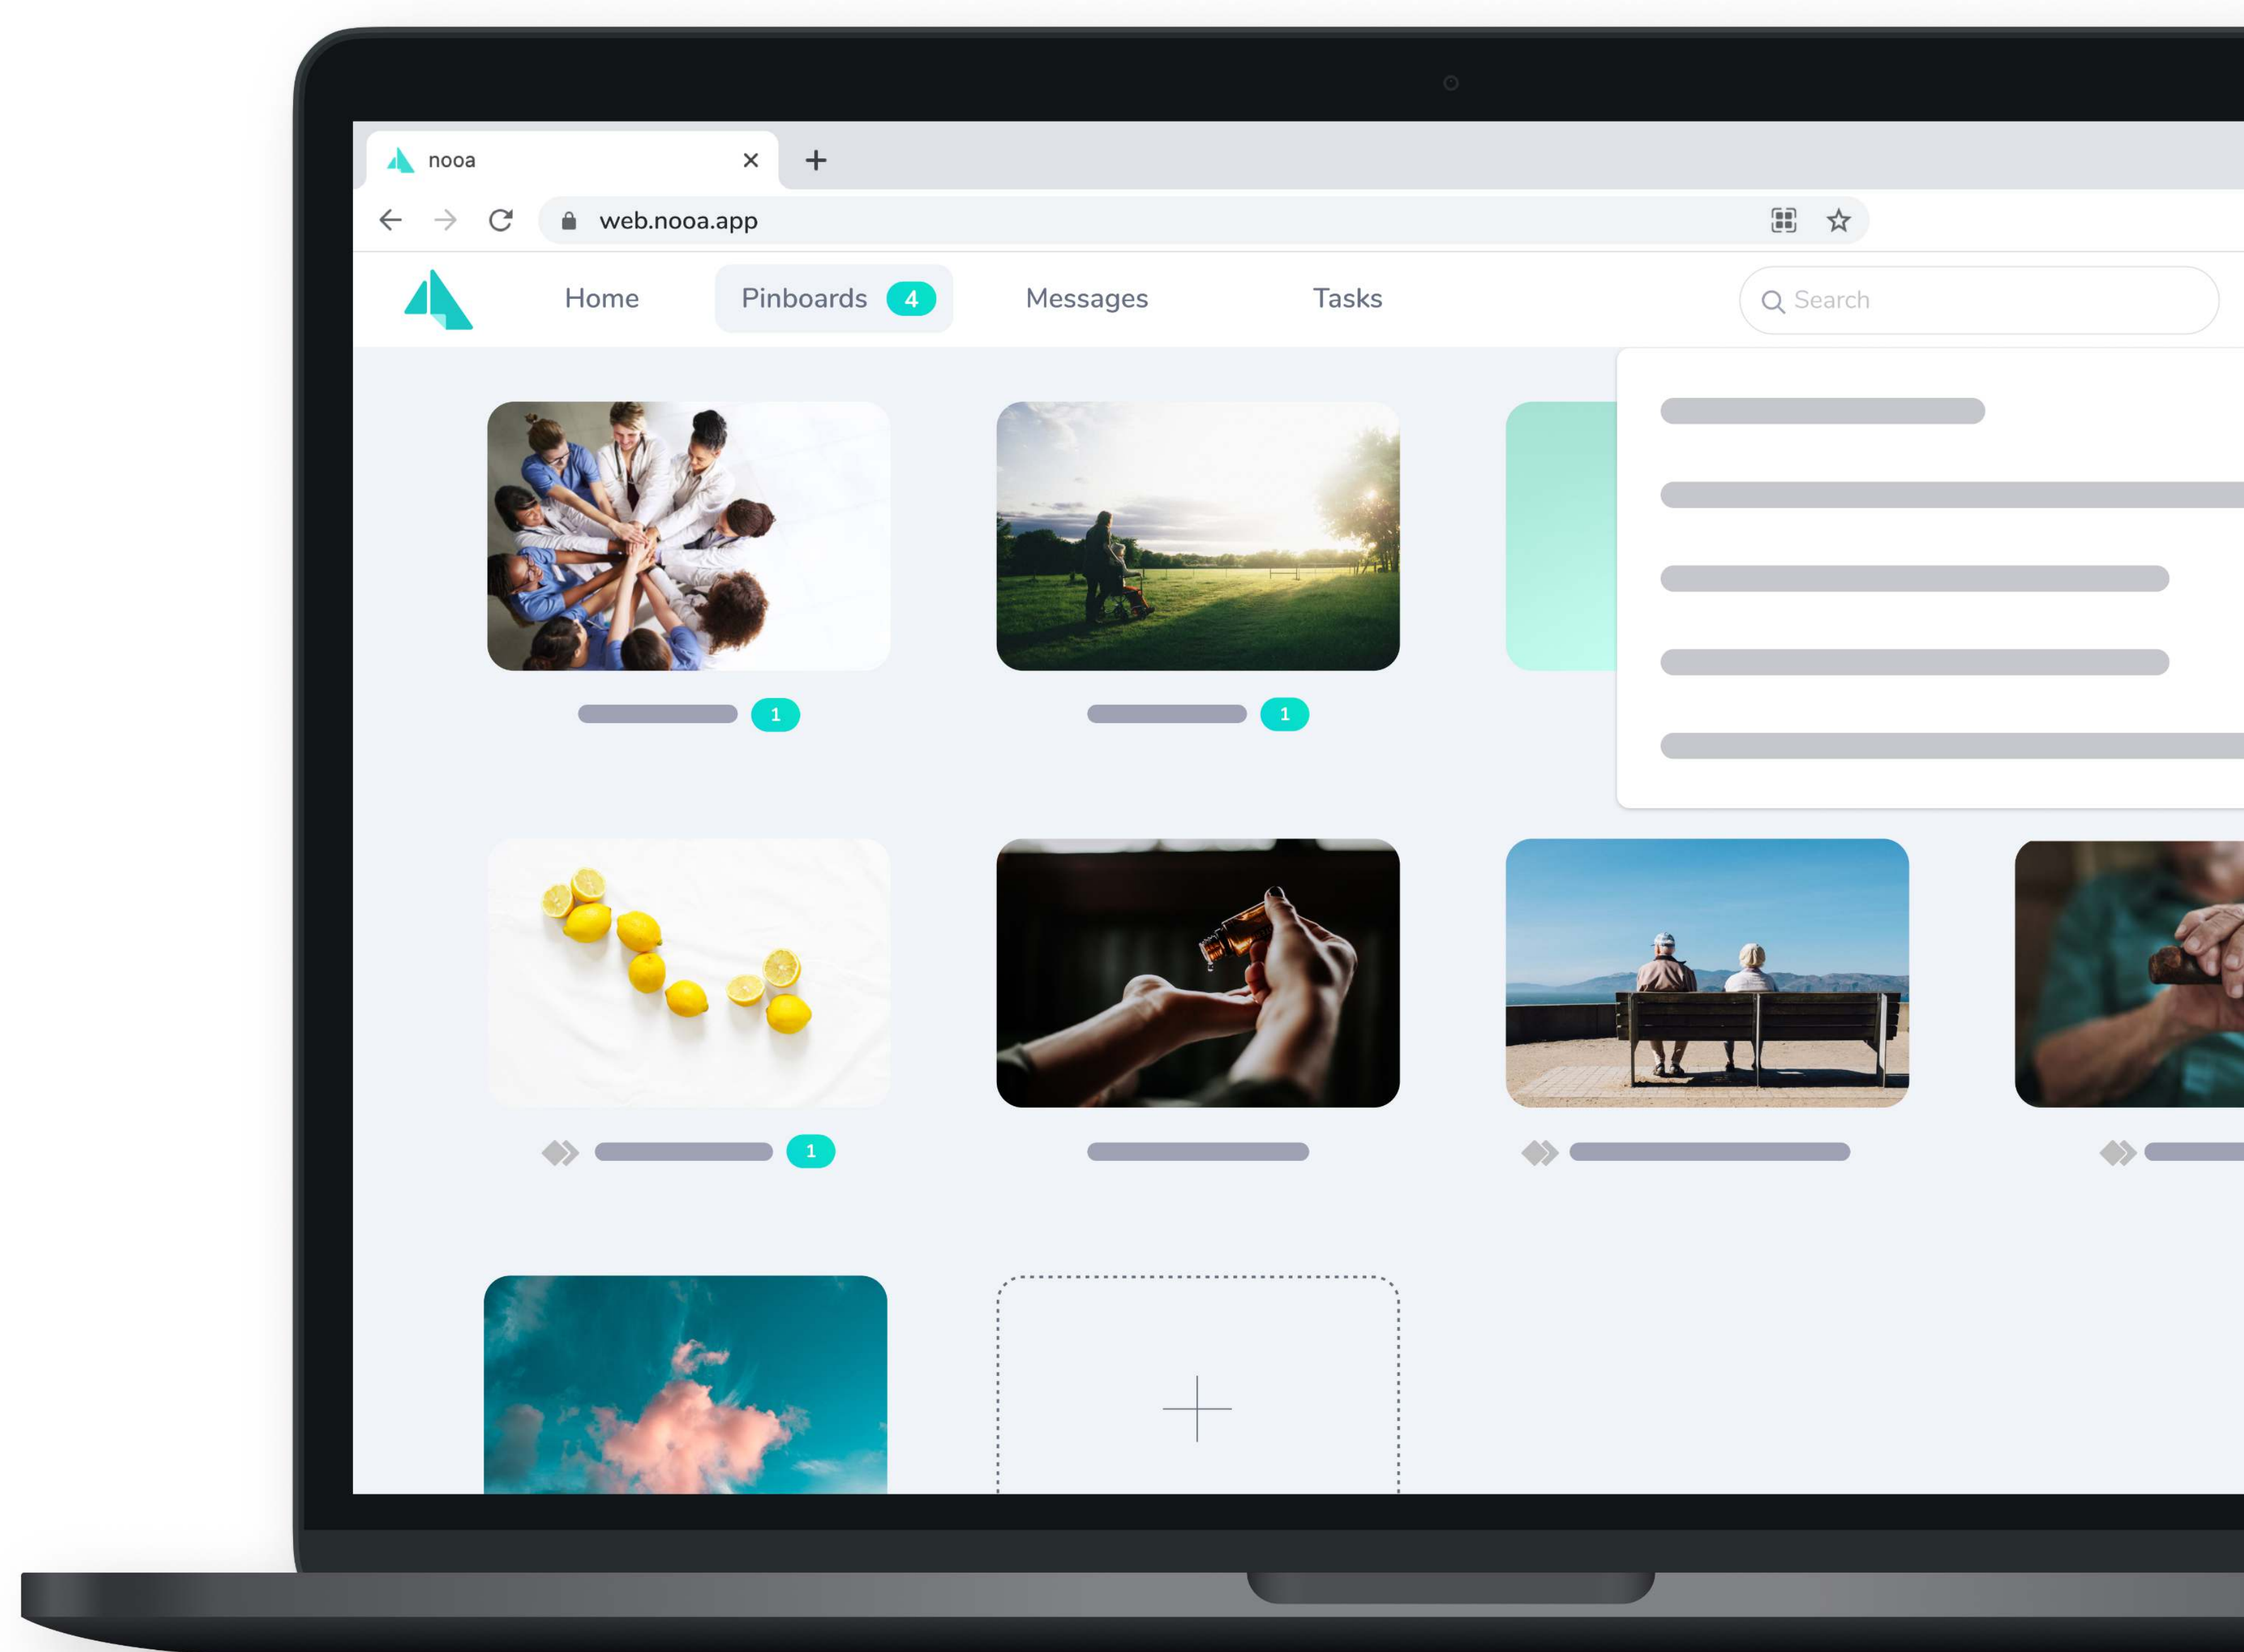

Keep everyone up to date on important events and with relevant information, posting things as they happen

Stay on top of things

Follow conversations through comments, likes and read receipts, helping staff stay on top of things before they ever get out of hand

Centralise communication

Take the pressure off staff by streamlining communication, adding them to pinboards as needed

Direct Messages

Quickly and securely exchange messages with colleagues or external contacts - like a messenger, just built for care.

Enable secure one-to-one communication

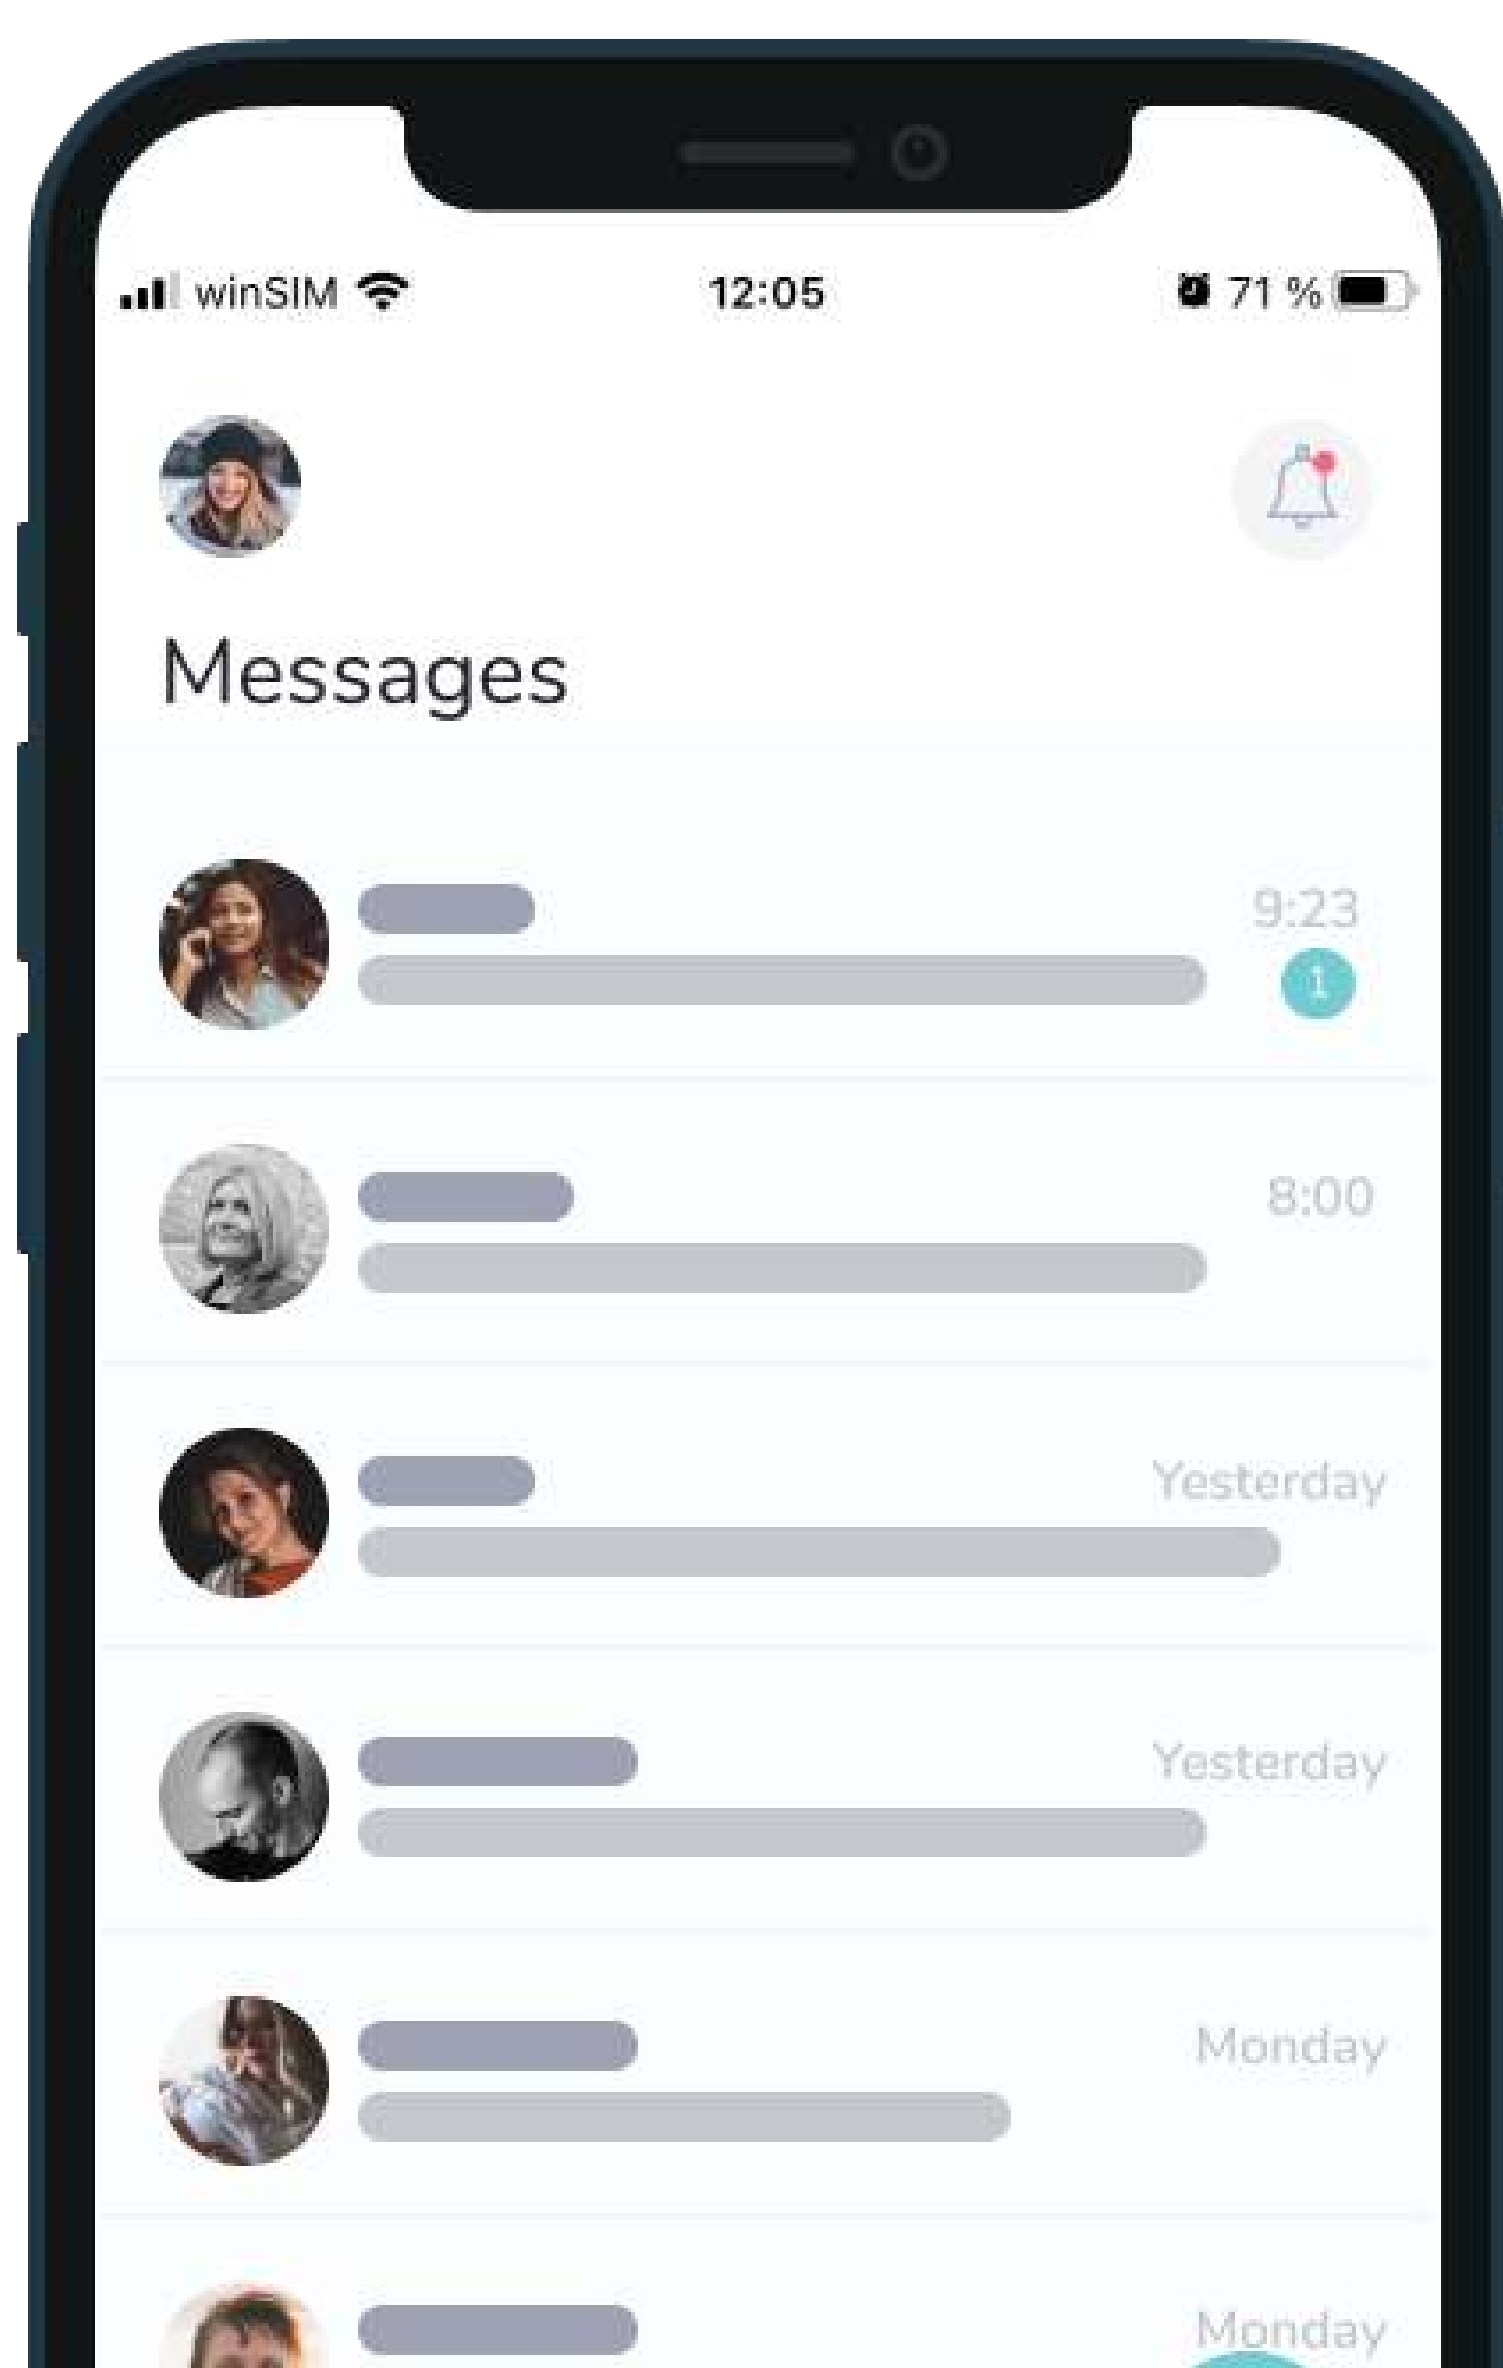

Save time by enabling staff to communicate directly in a quick and secure manner

Share sensitive information

With direct messages, only the recipient and you see the content, freeing you up to share sensitive information

Replace messengers

Replace insecure or hard-to-use messengers with a user-friendly app - that also works smoothly on every PC

Task Management

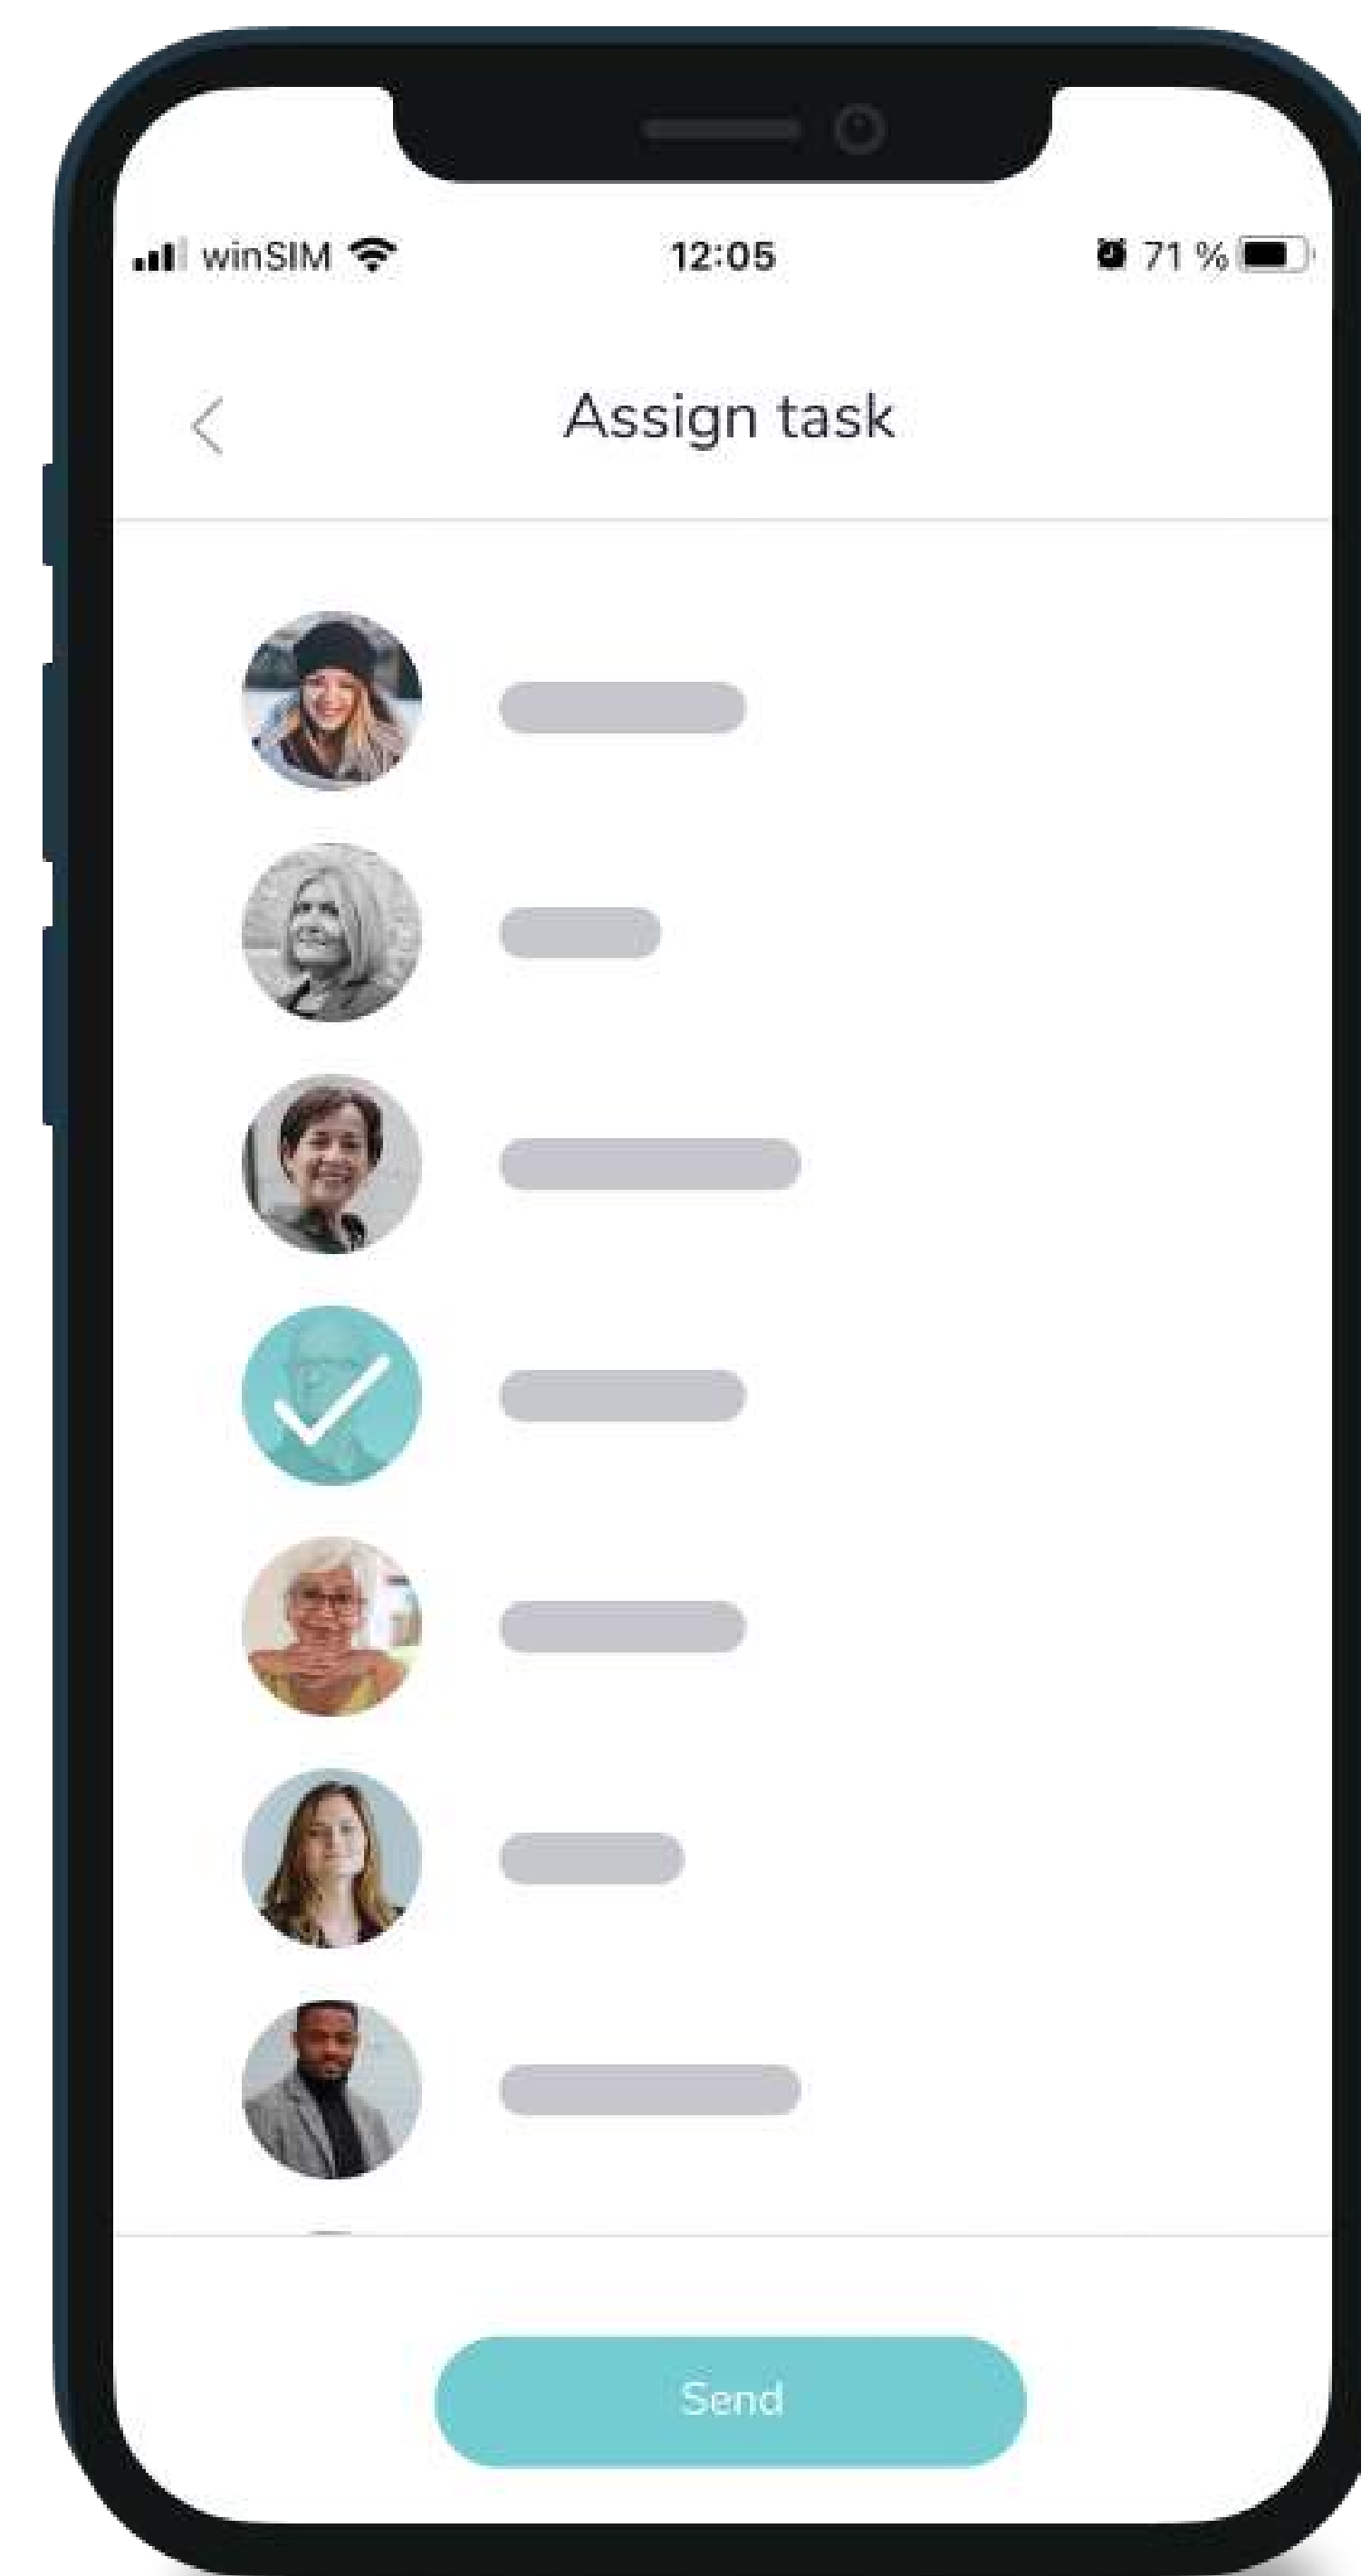

With inbuilt task management, organise, take notes and assign tasks - and track them effortlessly.

Manage tasks from anywhere

Whether you are in the office or visiting a client - create a task, set a date, and mark it done once finished

Work on issues as a team

Share tasks with others and receive notifications when a task is due or has been (re-)assigned

Admin Cockpit

Keep an eye on things in the Admin Cockpit.

Centralise user management

Add internal users or invite external contacts, managing all conveniently and securely in one place

Make compliance a breeze

Keep control of data protection and privacy with roles and user rights to set permissions. Immediately block credentials in case of loss or theft to secure data
