

The perfect addition to your busy day in care

nooa keeps you connected with everyone so that you can communicate whenever the time is right. You are automatically informed about new activities and can use it wherever you want, how you want. The best part? You can simply log off after work.

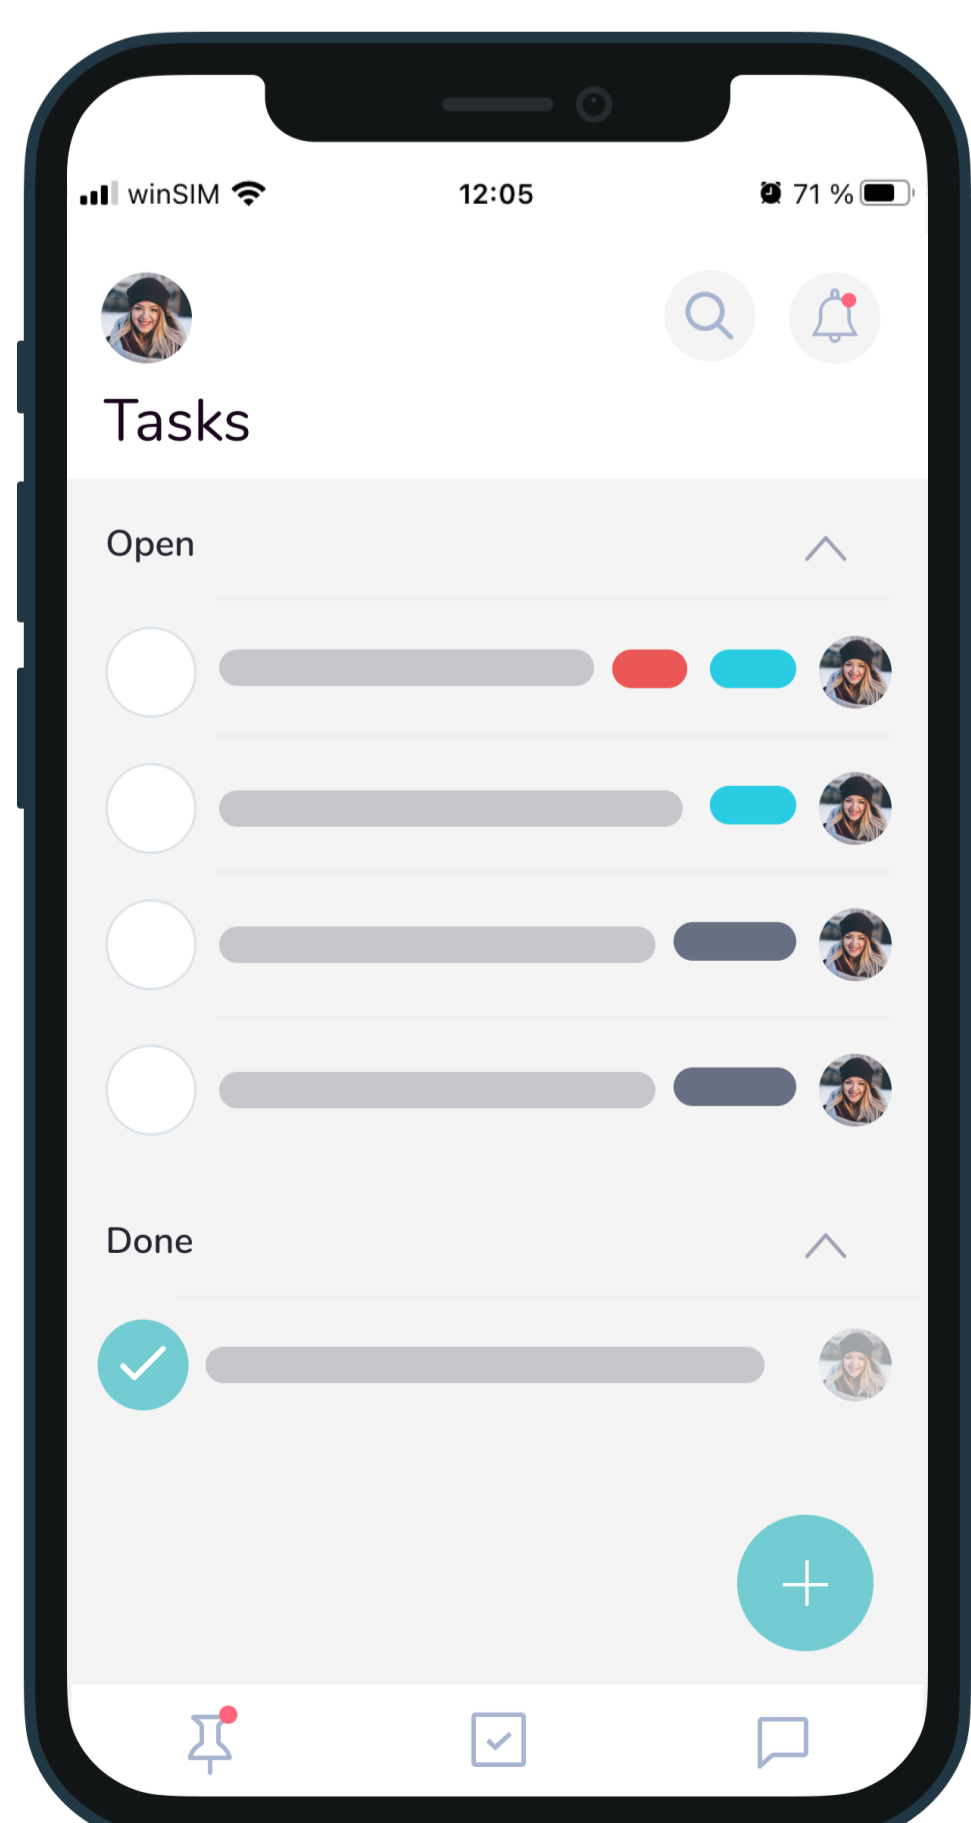

Team Communication

Send messages to your colleagues: whether to the entire team, the office or a separate group.

You can create posts, comment and like contributions, and share files such as images and PDFs.

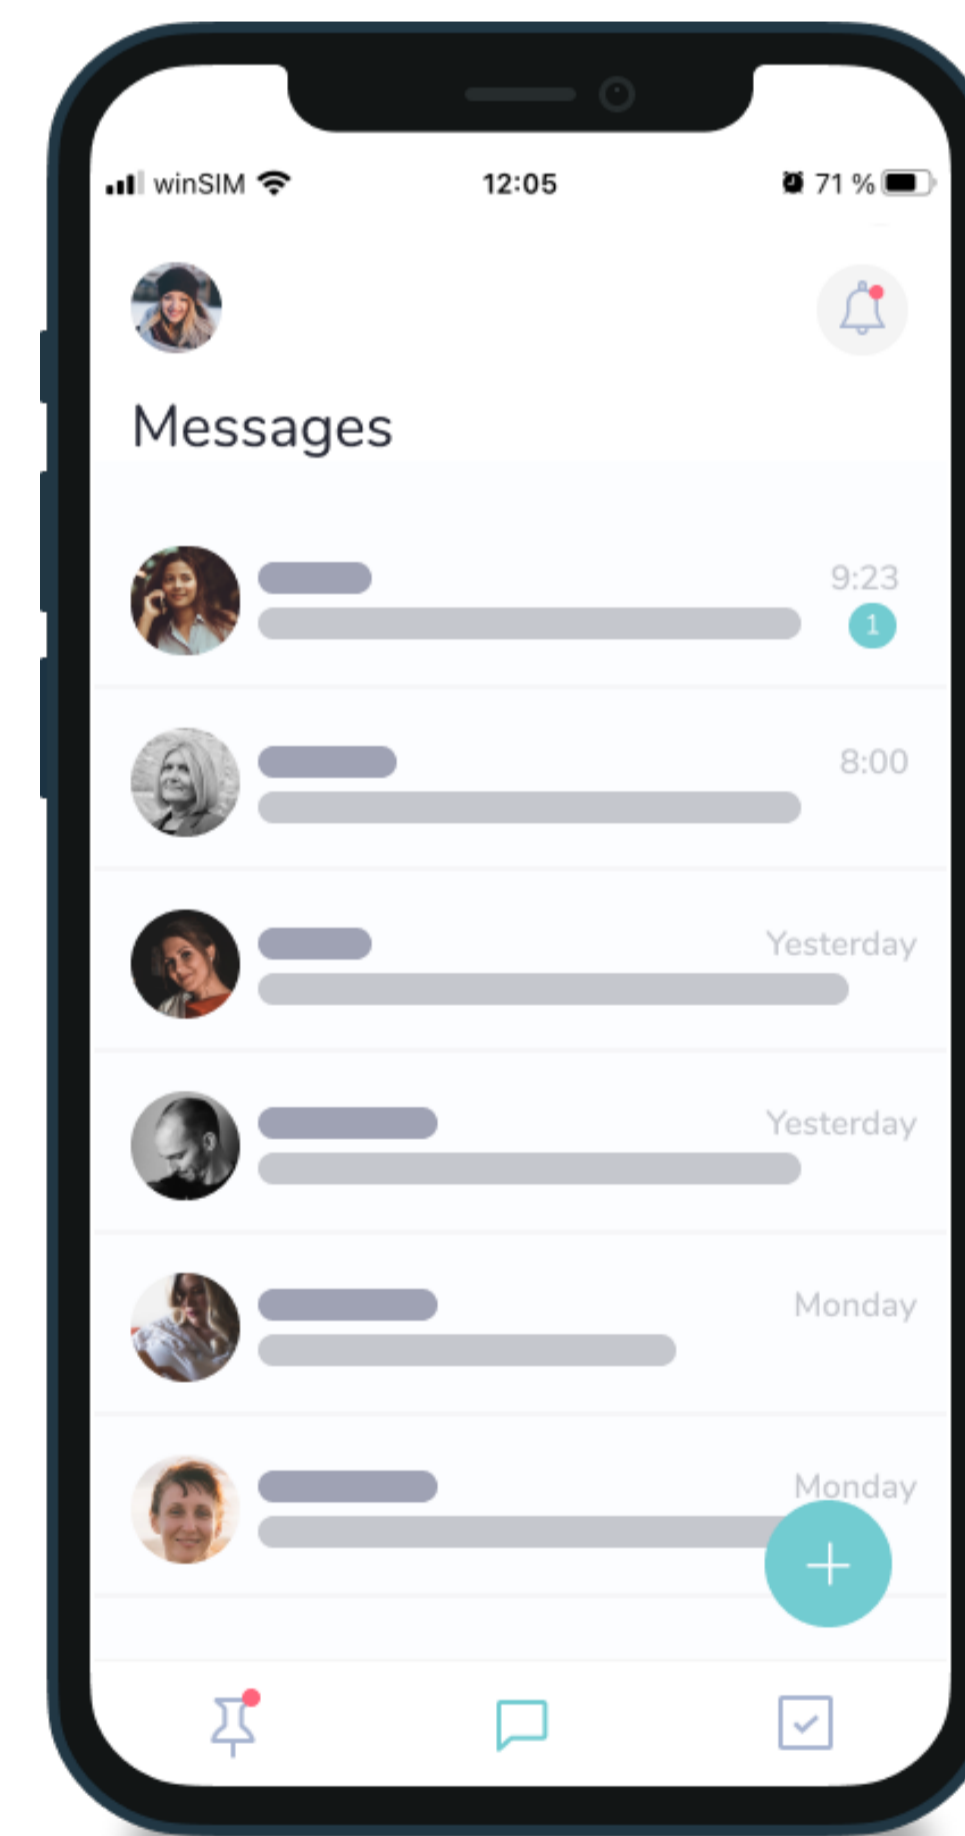

Tasks

Never miss another task or appointment by keeping track of things when they come to mind. You can also assign tasks to others, set due dates and add notes.

When a task is done, check it off.

Private Messages

You can also communicate directly with each other. The messages are private - like in a messenger.

By the way, nooa also works on your tablet or PC - so you can be logged in on multiple devices!

“ Before, we always used WhatsApp. But we're not really allowed to do that because of data privacy. Now we use nooa. I like it much better.

Emma, Carer
