

# Meraki Access Points & Licenses

## WI-FI NETWORK MANAGEMENT

- Use the Proximity + **Meraki** integration to allow network access only for active status employees
- Create unique, temporary networks to grant Wi-Fi access to meeting attendees for the duration of a reserved meeting
- Display temporary Wi-Fi networks in meeting rooms
- Spin up and tear down temporary networks with random and unique SSID names and passwords
- Prevent returning guests from having long-term access to your network
- Manage network permissions without ongoing IT support
- Extend Wi-Fi signal strength throughout your building

## PRICING & REQUIREMENTS

- As a general guideline, order one MR-42 model per 2,000 square feet or 40-60 wireless clients
- Order at least one access point per floor regardless of square footage or number of wireless clients
- Walls, building construction and other Wi-Fi networks can also impact signal strength and the number of recommended access points
- Meraki access points start at \$800 for our recommended model
- Annual Meraki licenses and support also available for purchase
- Visit the **Order** tab of your Proximity site from your dashboard to place an online Meraki order

Easy-to-manage networks and secure Wi-Fi for employees and guests
