

# Mid-Size Industrial Manufacturer Leverages Denovo's Private Cloud to Divest From Parent Company

BOULDER, CO | January 9, 2019

Denovo assisted a mid-size, industrial manufacturing company, which deals in heavy equipment, to quickly establish a standalone instance of their JD Edwards Enterprise Resource Planning (ERP) system on Denovo's Private Cloud due to a strategic company divestiture.

As a result of this divestiture, critical business systems had to be split apart to run independently from each other. Denovo proposed a creative solution, which provided the financial flexibility required. Throughout the transition, Denovo demonstrated their JD Edwards expertise and worked within an aggressive time line to meet contractual deadlines for the divestiture. The bundle of services included hosting in Denovo's Private Cloud, Managed Disaster Recovery, and supporting Managed Service agreements for their JD Edwards ERP and ancillary systems.

The parent company had been providing interim IT support services for JD Edwards and selected Denovo as their partner because of their need to quickly establish a hosted and managed solution for their ERP. This allowed the parent company and the divested entity to focus on other core IT challenges resulting from the divestiture.

“I am proud that Denovo has a collective team that partners closely with our customers to create mutually beneficial deal structures, and we are able to achieve accelerated project timeliness, as we did with this customer. Helping with scenarios such as these sets us apart from our competition.” Marty Snella, CEO, Denovo

## About Denovo
