

Customer Story

Serva Group, LLC

ABOUT:

MODERNIZES JDE E1 INFRASTRUCTURE WITH THE CLOUD

SERVA develops specialized gas and oilfield equipment to offer reliable, safe and efficient products for global energy development. A division of EnTrans International, SERVA specializes in the design, manufacture, and installation of equipment and technologies for energy markets across the world.

CHALLENGES:

- Separate IT from parent company and needed to new infrastructure for JD Edwards
- Fewer skilled resources to manage technology
- Required a disaster recovery solution

RESULTS:

- Separated IT on time
- Eliminated infrastructure management complexity
- Single source for infrastructure and application needs
- Leverages Denovo's MSP relationship with Oracle to easily move into Oracle Cloud Infrastructure

www.servagroup.com

Location: Catoosa, OK
