

Customer Story

Nalcor Energy

ABOUT:

Nalcor Energy is a provincial energy corporation Nalcor Energy was created in 2007 to manage and lead the development of the province's energy resources. The core business is the generation and transmission of electrical power to provide safe, reliable and dependable electricity to utility, industrial, residential and retail customers with a focus on environmentally-responsible and sustainable growth.

RESULTS:

- Migrated from World A9.3 to EnterpriseOne 9.2 to maximize new technologies and functionality
- Eliminated 15 years worth of World customizations with functionality in Enterprise One
- Increased overall system performance and resource productivity
- Expanded users from 1,500 to 2,000 with the upgrade
- Leveraged additional functionality and made changes to processes to ensure efficient, best-in-class processes enabled by the upgrade
- Realized the return on investment of a low cost TCO of JD Edwards
- Implemented Capital Asset Management to produce and track significant capital projects (Dam Building and Hydro Electric Power Generation)
