

Denovo MANAGED SERVICES

Lifting and Shifting On-Premise Oracle Applications to the Cloud

The Cloud has quickly become an integral component of digital transformation. Organizations are aggressively adopting the cloud as the days of the data center come to an end. **Now is the time for your organization to get out of the infrastructure business and start enjoying cloud benefits:**

- 1 ELIMINATE CAPITAL COSTS**
by getting rid of data center/infrastructure costs and switching to a monthly operational cloud expense.
- 2 INCREASE AGILITY**
by leveraging cloud elasticity to scale up and down based on need.
- 3 INCREASE IT VALUE**
by reallocating data center related resources to tasks that drive more value to your business.
- 4 LOWER OPERATIONAL EXPENSE**
by taking advantage of a less expensive infrastructure model and the opportunity to pay as you go.

NOT ALL ORGANIZATIONS ARE READY FOR SaaS

SaaS applications have recently emerged to replace traditional on-premise enterprise software. Not all organizations are ready, willing, and able to implement a new SaaS solution and discard their on-premise.

Why might you not be ready?

- Cost, complexity, and effort of a new implementation
- Functionality limitations
- Required customizations
- Potential user adoption challenges
- Competing business priorities
- Inability to digest and regression test frequent upgrades

**NOT READY
FOR SaaS?**

LIFT AND SHIFT YOUR ON-PREMISE APPLICATIONS TO THE CLOUD

Cloud benefits can be easily achieved without ripping and replacing legacy applications. Migrate your on-premise applications to the cloud.

- ✓ NO need to re-implement
- ✓ NO user impact
- ✓ NO loss of functionality
- ✓ NO need to re-license

IT'S NOT JUST ABOUT THE CLOUD...

It's about the ongoing application and cloud infrastructure management that is critical to success. Denovo overlays the cloud with a complete portfolio of subscription-based cloud management service options. With expertise spanning the functional and technical cloud layers, Denovo makes sure you get the most out of your cloud environment.

FOUNDATION SERVICE

The core to our Managed Services offering is our help desk assistance for SLA-driven resolution of issues encountered in your Oracle environment.

FUNCTIONAL SUPPORT

Improve the quality and reduce the cost of support with quick resolutions to your functional application issues and requests.

INFRASTRUCTURE MANAGEMENT

Technology is rapidly changing, and it can be costly to continually maintain and advance to ensure your applications are running at optimal performance.

PLATFORM MANAGEMENT

Hosting your application is only a part of it. It is still important to tune and optimize the platform to ensure your application is running at peak performance.

MANAGED DISASTER RECOVERY

With over 30 years of experience, we have developed a time-tested, proven methodology that ensures your business is prepared for the unexpected.
