Denovo

FULL SPECTRUM MANAGED SERVICES FOR ORACLE E-BUSINESS SUITE

Just as Oracle E-Business Suite (EBS) helps manage the complexities of your business, let Denovo's Managed Services help manage your infrastructure and get the most value from your application.

Our solution experts can maintain and optimize EBS on your choice of cloud or on-premise — helping to reduce costs and make sure it runs smoothly and securely. We ensure that maintenance, support and upgrades are handled so that your team can focus on areas that drive innovation and grow your business.

Our clients that leverage Denovo's expertise across Oracle technologies, applications and cloud infrastructure experience these benefits:

Maximize your Oracle investment: by reducing ongoing internal support costs and optimizing the performance of your EBS application.

Increase IT Value: by reallocating IT support resources to tasks that drive more value to your business.

Reduce Risk: from risk associated with new technology adoption or staff attrition.

Lower Operational Expense: by taking advantage of a less expensive infrastructure model and the opportunity to pay as you go.

LET OUR MANAGED SERVICES DO THE WORK FOR YOU.

Ongoing application and cloud infrastructure management with our EBS Managed Services is critical to your business' success. And it is easier to move to the cloud than you might think. Our expertise in migrating e-Business Suite to the cloud provides our customers enhanced operational efficiencies, improved security, increased compliance, reduced capital costs, assured code-current status, and more.

" Denovo provided the support to keep us on track and under budget. We are moving forward, knowing we have a resource in Denovo to help us meet our goals."

DENOVO SERVICES

User Based Services	Functional Support, Enhancements & Applications Lifecycle Management	
Applications Management	Cloud Managed Services at OCI, Edge & Customer	MDR Disaster Recovery as a Service
Any Cloud	Operations & Platform Services	

Our full suite of Managed Services spans applications, as well as the functional and technical cloud layers, giving you the most out of your EBS application.

Let Denovo manage your e-Business Suite to help mitigate the complexities of modern businesses, help you make decisions faster, reduce IT cost, and improve performance with its team of solution experts.

Denovo Services: The core to our Managed Services offering is our help desk assistance for SLA-driven resolution of issues encountered in your Oracle environment.

Functional Support: Improve the quality and reduce the cost of support with quick resolutions to your functional application issues and requests.

Platform Management: Hosting your application is only a part of it. It is important to optimize the platform to ensure your application is running at peak performance.

Cloud Hosting & Infrastructure Management: Technology is rapidly changing, and it can be costly to maintain and ensure your applications are running at optimal performance. Don't bear that burden, allow Denovo to host your Oracle environment.

Disaster Recovery as a Service: Protect your assets. With over 30 years of experience, we have developed a time-tested, proven methodology that ensures your business is prepared for the unexpected. Denovo ensures your complex IT environments will be available after any catastrophic event.
