Quick Reference Guide: Advanced Search

- Type each concept in a separate row. Connect each row with **AND**.
- Use truncation (*) and type "3D print*" as a phrase, inside quotation marks, to get results with 3D print, 3D prints, 3D printer, 3D printed and 3D printing.
- Connect different forms of a single concept with the Boolean search operator **OR**.
- Click plus (+) to add extra rows.
- Your default option for searching is **Select a Field**, which searches all fields in the record. You can also choose to search fields from this extensive list to focus in on specific data.
- Tick here to limit results to scholarly peer reviewed journal articles.
- Limits let you specify a date range, publication type (like patent, standard, or journal article) or language.
- You can adjust search modes from what's been preset. NOTE: Boolean/Phrase will automatically add **AND** between search terms in single search box if you do not type **OR**.
Your search history appears above your search results. You can see your terms, the mode of the search, and actions, including editing your search.
