

SCRAP THE SPREADSHEETS AND PDF'S!

Our first and second promotion had acceptable results but by the third promotion our target customers understood how easy the system was to place orders and have ordered over \$300K in less than 2 weeks! We are planning for many more.

Vice President, Grocery Client

Real Time Supplier and Member Ordering Visibility

See Data. Buy Better. Sell More.

System Agnostic

It doesn't matter what POS, ERP or Accounting system is being used, OrderEase connects and aggregates the supply chain data into one system.

Accessible Data

The ability to view data from vendors and members will empower smart business decisions. Your buying group and members will all benefit.

Increase Revenue

Better insights to data provides more power to negotiate pricing. Resulting in cost savings and an increase in revenue, along with satisfied members.

Operations & Marketing Management For Buying Groups

Buying Group

Easy and accurate rebate and credit management as well as real time data by member, vendor or order quantity. Sales volume insights for price negotiations and the ability to forecast inventory needs for members.

Vendors

Reduces manual order entry and associated labor costs by going automated and digital. Provides digital catalog and specific pricing level access to any retailer within the buying group.

Members

Direct visibility to inventory levels of vendors for placing fast accurate orders. Access to order history and favorites, making it easy to re-order. Plus, catalog information can be pushed to POS & eCommerce platforms to create seamless transactions.

Marketing

A built in powerful marketing engine to send emails to members or vendors about power buys, upcoming events or new vendor partnerships. Connecting operations and marketing in one solution. True value!

**We Don't Replace Your Systems,
We Embrace Your Systems.**

We are ready to integrate and exchange data with any software.
