

IMAGINE MORE TIME. WE MAKE THAT HAPPEN.

“

Thank you for providing us a single technology solution that quickly connected our internal systems with incoming orders. We realized a positive ROI almost immediately by reducing manual tasks and automating wholesale ordering. As we add more channels we will see greater automations.

”

# Wholesale Ordering CAN Be **EASIER**

**Product Information. Pricing & Inventory. Order Management.**

## **Fast ROI**

Lower operational costs result from less data entry, printing costs and fixing order errors. Most clients see a positive ROI within months of integration.

## **Boost Sales**

Data, time savings, rapid deployment, and connectivity between wholesale and retail systems opens sales opportunities at all levels.

## **Customer Experience**

Digital catalogs give more visibility to products and inventory. Order history, favorites list, and quick re-ordering are exactly what busy retailers need.

# Digitally Connecting Wholesale, Retail and Buying Groups

## Wholesale

Transform any input into digital ordering. Our integration solution communicates via API, data parsing, and applications to turn both inputs and outputs into digital transactions within your supply chain. Embrace the paperless transformation.

## Retail

Make your wholesale buying fast and easy. Use our web and mobile apps with barcode scanning for efficient ordering and connect directly to your POS system and webstore to manage inventory and costs.

## Buying Group

Visibility and data supporting price negotiations, managing credit, and improve member experience. You get a real time any time view of all transactions between suppliers and members plus an integrated marketing engine.

## Trade Show

Our virtual trade show platform leverages the power of the OrderEase ordering solution. Designed with booking shows at the forefront, you get the same functionality as if you were attending a live show, plus more.

**We Don't Replace Your Systems,  
We Embrace Your Systems.**

We are ready to integrate and exchange data with any software.
