

MOBILE: GAS DETECTION

PORTABLE PROTECTION

When your process shuts down during a power outage, natural disaster or turnaround there is still the potential for dangerous gas to be present. Protect your employees with TechStar's mobile gas detection solution that can be easily placed at a moment's notice. The mobile systems utilize the advanced technology of the MSA Ultima X5000 Gas Monitor and are solar powered, easy to store when not in use and are fully customizable to meet your needs.

SOLUTION

- Advanced H₂S & LEL Gas Detection
- Strobe Light and Two Horns Provide 360° Audible and Visual Warning
- Solar Powered with Battery Backup for 24-Hours/Day Operation
- Fully Customizable to Meet Your Needs
- Cart Based Design for Portable Use Anywhere You Need It

ADVANCED TECHNOLOGY

- Utilizes MSA's Most Advanced Ultima X5000 Gas Monitor
- Aluminum Construction for Rust-free Performance
- Solid Tires for Flat-free Performance
- Class 1 Division 2 Design

WIRELESS MONITORING

- 900 MHz Spread Spectrum Wireless Connectivity Up To 3 Miles
- Real-Time Monitoring from Centralized Location or Smart Phone
- Can Connect Up To 30 Mobile Units to Centralized Gateway
- Ability to Connect to Existing Control System
